

WARRANTIES

The finish on Vantage and AWS Commercial Joinery is supplied by market leaders Interpon Powder Coatings and Dulux Powder Coatings. Vantage offers comprehensive warranties on the finish of your windows and doors for your peace of mind. Depending on your colour choice, you will benefit from warranty cover ranging from a minimum of 7 years film integrity and 7 years colour integrity for residential applications, and up to 15 years film integrity and 15 years colour integrity for high-end residential and commercial applications. Please consult your Vantage fabricator to obtain details of the warranty terms and conditions or to view a sample warranty.

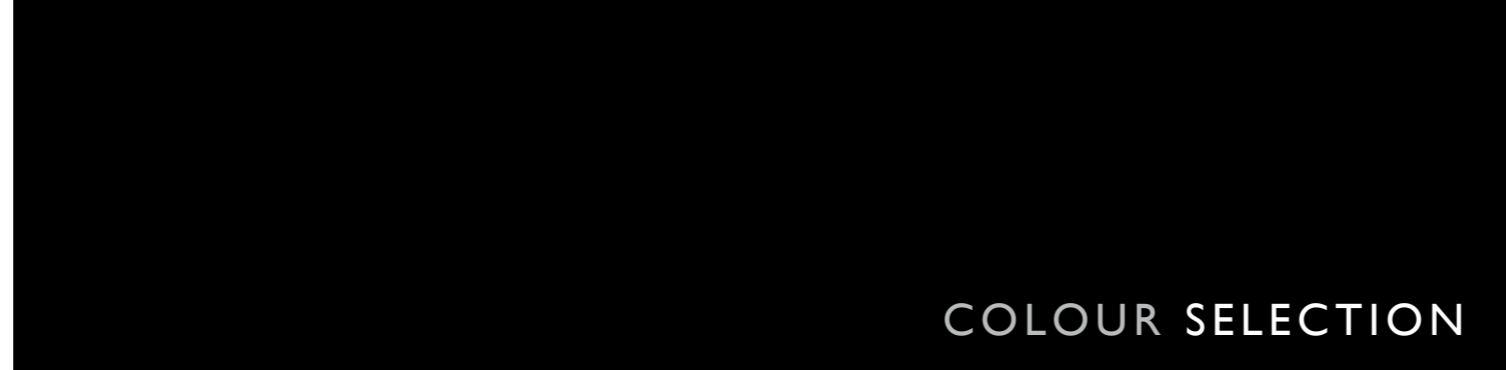

CARE AND MAINTENANCE

Like any other painted surface, powder coated aluminium performs at its best when it is properly cared for. Keeping the surface free from pollutants and environmental contaminants will give you the maximum benefit and long lasting performance from your powder coated surface.

RECOMMENDED CLEANING METHOD

A gentle clean with a soft brush and mild detergent, followed by a fresh water rinse, will maintain the long-term performance of your powder coated products. In rural or normal urban environments cleaning should occur every 12 months. In areas of high pollution, such as industrial areas or coastal environments, cleaning should occur every three months. In particularly hazardous locations, such as beachfronts, severe marine environments or areas of high industrial pollution, cleaning should be increased to monthly. Do not use strong solvents, abrasive cleaning products or any product recommended for thinning paints. If you need to remove splashed paint, sealants or mastics from your powder coated products use white spirits, carry out cleaning in shade and during cooler temperatures using a soft cloth and gentle wiping only.

We recommend that, prior to using any cleaning agent on your windows or doors you test a small non-visible area of your powder coated product to ensure that no visual colour change or damage will occur. Ask your fabricator for the care and maintenance information specific to your product choice.

COLOUR SELECTION

Powder Coating Licensing Authority

Architectural Window Systems (AWS) is a licensed Qualicoat applicator, ensuring all Vantage Aluminium & AWS Commercial Joinery is finished in accordance with AS3715.

The international Qualicoat system is administered by the Australasian Institute of Surface Finishing; licensed applicators are independently audited for conformance to the Qualicoat standard. Qualicoat is your independent assurance that powder coated aluminium complies with Australian Standards.

OUR PHILOSOPHY

We have a clear and simple philosophy, provide our customers with exactly what they want. We can supply windows and doors in a wide variety of colours; however, to help you with the difficult decision of colour selection, we have compiled a range of colours in this chart which are in tune with the current design climate and reflect the more popular colour choices for windows and doors.

When you select a colour from these ranges you can limit your costs both for powder coating and hardware matching.

CHOOSING YOUR POWDER COATING COLOUR

The colour you choose for your aluminium joinery will depend ultimately on the look you are trying to achieve. For a modern, clean look you could opt for a tone a few shades up or down from your house cladding, match the joinery to the house cladding or contrast totally with dark or black joinery against a light coloured house. Contrasting colours in natural tones will give your home a lasting quality that blends with the environment. When you are choosing your colour consider that different colours and finishes will perform differently in different environments. Lighter shades and matt finishes will perform best in the harsh Australian climate and can still maintain an up-to-the-minute appearance.

STANDARD COLOURS - GROUP A

This group of neutral tones will enhance both contemporary and traditional designs. Group A colours are our most widely selected, the neutral basis of the group lends itself to many design applications and offers easy colour matching of hardware.

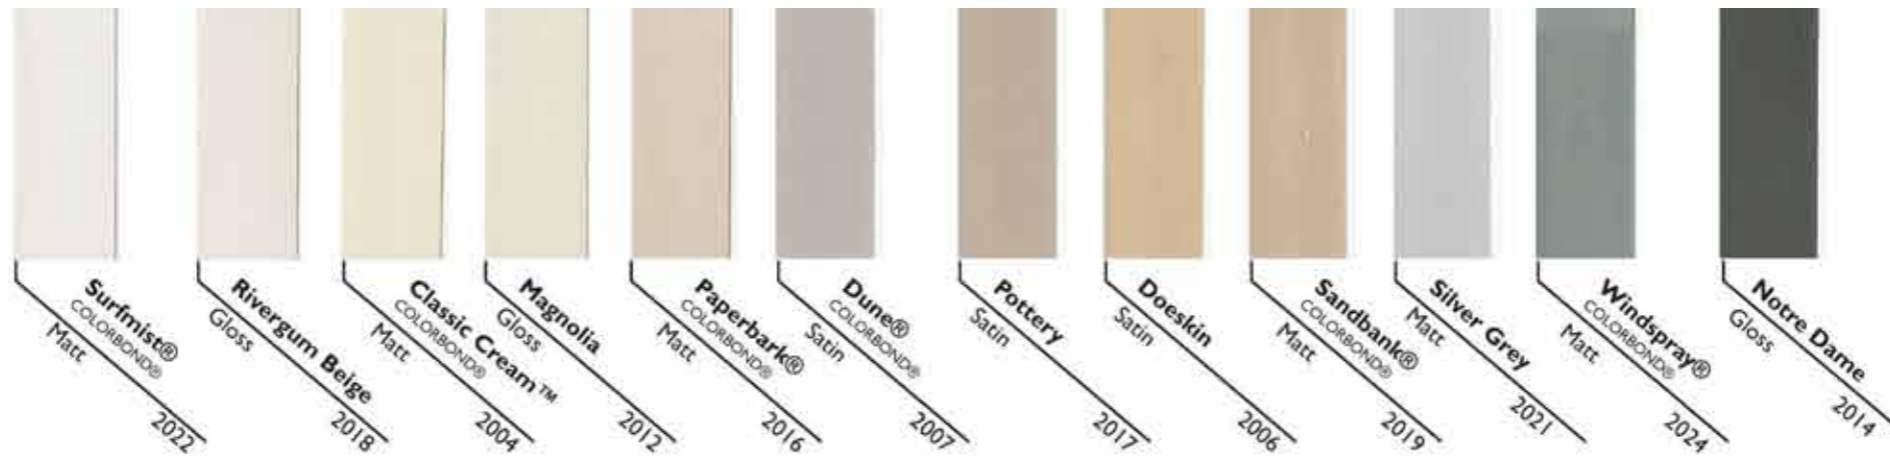

POPULAR COLOURS - GROUP B

This range represents some of the current and popular colour selections for aluminium joinery. The group includes a number of stronger, bolder colours which enable you to create a look that contrasts or blends with to your environment. Many of the colours within this group are matched to COLORBOND® steel, allowing colour consistency to be achieved throughout your entire project.

SELECTED PEARLS - GROUP P

Many contemporary designs demand extra luxury; the colours in the Selected Pearls range offer a modern opulent finish, giving the project a special quality and lasting good looks.
