All standard Hanlon timber and aluminium frames have been designed and glazed in accordance with the relevant Australian Standards. For non-standard designs and configurations we recommend you consult your nearest Hanlon Windows Australia Representative.

Cedar is a species noted for its beautiful variation of colours and therefore no attempt is made to colour match timber components. Cedar is one of the finest joinery timbers in the world ideally suited for staining to enhance the rich variation in colours.

All window details and codes used in this size and range brochure are for Hanlon standard sizes. Custom built windows can be made to your specifications as a variation to our standard designs.

Note: Hanlon Windows Australia continually improves its product range using the latest technology and innovations in engineered components including laminating and veneering.

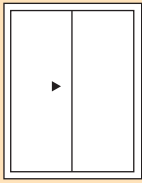

Hanlon Windows assume no responsibility for errors, omissions or any consequences of reliance solely on this publication.

WINDOW CODES

ALL WINDOWS ARE VIEWED FROM OUTSIDE

EXAMPLE:

The letters at the start of the code indicate the window type (eg. **TA** 1218 - **TA** Timber Awning).

The first two numbers indicate the approximate height (eg. **TA 1218** - 1198mm high).

The last two numbers indicate the approximate width (eg. **TA 1218** - 1810mm wide).

If there is a letter at the end of the code it indicates the transom or chair rail type (eg. **TA 2118 T**).

TA – Timber Awning
TH – Timber Double Hung
TF – Timber Fixed
TC – Timber Casement

TD – Terrace Sliding Door
TS – Timber Sliding Window
GD – Glass Door hinged
EU – Eurodoor Bi-folding

EUW – Euro Window
TL – Timber Louvre
TSA – Timber Slide-Aside

RETRACTABLE SCREENING FOR EURODOOR BI-FOLDING

ES2 Specifications

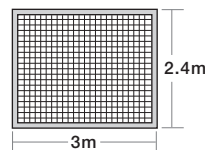

max frame size	
single screen	2400mm (H) x 3000mm (W)
double screen	2400mm (H) x 5800mm (W)

Putting an end to the compromises between uninterrupted views and unrestricted movement and the need to eliminate unpleasant flying pests.

Including a world-first fully integrated insect screening solution for bi-fold scale openings. ES2 screens are ready for action as soon as temperatures allow. The rest of the year the screen system can be rolled back out of view, with hardware integrated into the architecture of the door frame itself.

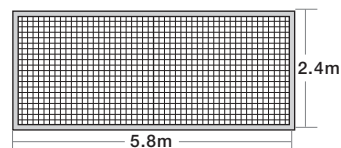

Created for real life use, ES2 allows for children friendly operation with fingertip ease using a simple magnetic catch which is operable from any height on the stile. Once positioned the screen can be released without fear of slamming shut.

Single Screen

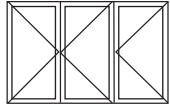

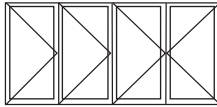

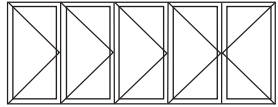

A single screen up to 2.4m high may be up to 3m wide.

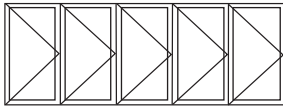

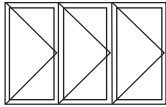

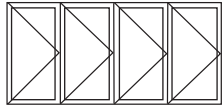

Double Screen

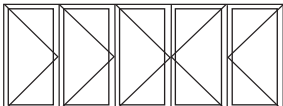

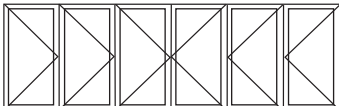

A double screen up to 2.4m high may be up to 5.8m wide.

ALL DOORS SUPPLIED LOOSE — Hardware by Builder

- All timber products have natural variations in colour, texture or grain pattern which are not to be considered defects
- Prior to hanging the door panel, the entire door, including door top and bottom edges, must receive two coats of paint, varnish or sealer to prevent undue absorption of moisture
- Failure to observe these guidelines may void your product warranty
- Doors over 710mm wide have muntin bar and 2 fielded panels
- Cedar hinged french doors have not been tested for water resistance
- No warranty on primed products

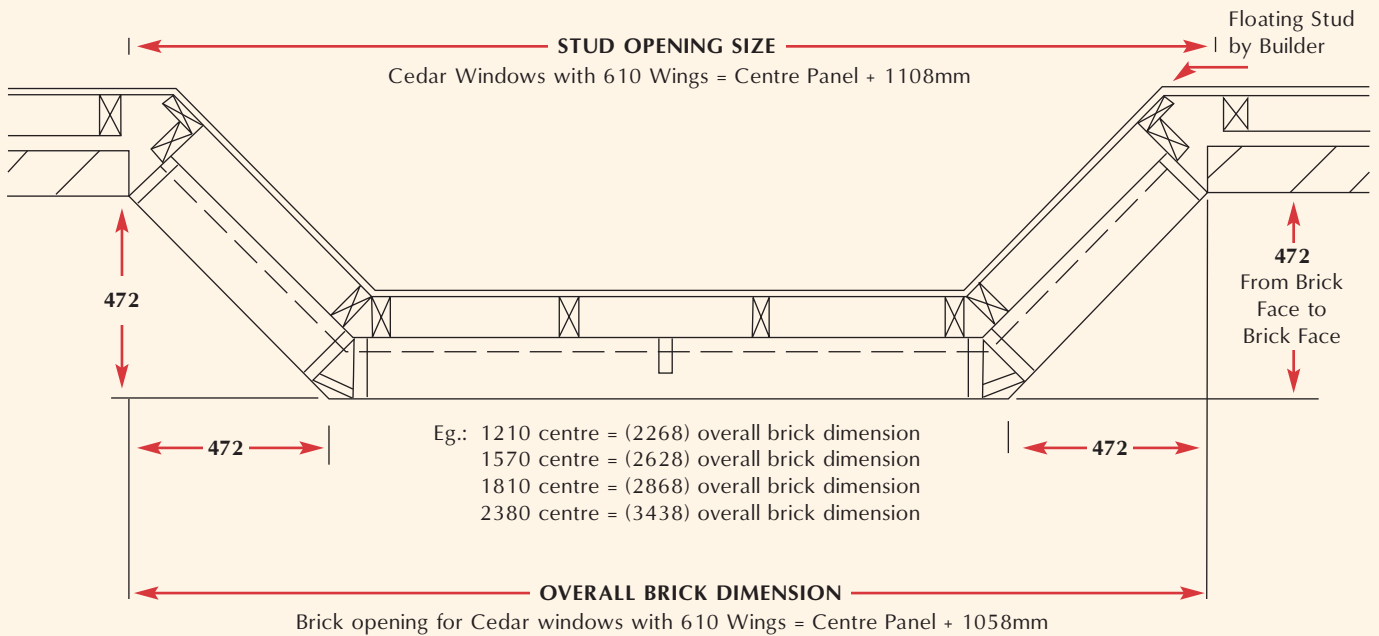

CEDAR
Fielded Panel also available to low lights
