

### KEY FEATURES

- This swivel bi-fold operator throws locking bolts into the frame at top and bottom of the panel. Optional key-locking (separately installed) is available.
- Having an operator handle located centrally on say a bi-fold door removes the need to bend down or stretch to reach flush bolts that might be located at the ends of the stiles.
- The MIRO™ handle is elegantly curved on the finger edge, with no visible fasteners when handle is in closed position.
- Matching hinged door lever furniture.
- Textured matt finish with AWS' Enduratec™ technology has been tested to last 10 times longer than traditional powder coat finishes in independent, neutral salt bath testing.
- Available in black, white and silver.

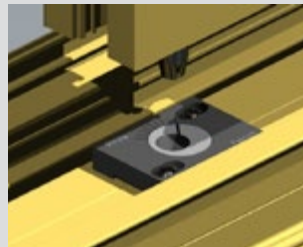

#### FINISHING

MIRO™ bi-fold operator can be supplied non-key locking. The furniture is available in a range of colours.

#### LOCKING

MIRO™ bi-fold operator can also be supplied in a key locking format.

#### ADJUSTABLE KEEPERS

On our bottom hung Bi-fold doors the keeper in head and sill is adjustable. This allows the panels to be tightened on the frame.

#### SUPPORT

Bolt tips are supported by extruded aluminium guides. Ensures the bolts fall in the right location and can withstand high wind loads.

#### DIMENSIONS

Height	150mm
Width	25mm
Depth	15mm
